Aims and Scope

Key areas covered by the journal:

- Energy Fundamentals
- Primary Energy Sources
- Renewable Energy
- Energy Exploration and Exploitation
- Energy Conversion Systems
- Energy Policy
- Exergy
- Energy Research and Development

Special Issue “Advanced Methods for Decision Making and Planning in Telecommunication Systems”

Guest Editors:

Prof. Dr. Igor Kotenko, St. Petersburg Institute for Informatics and Automation of Russian Academy of Sciences (SPIIRAS);

Prof. Dr. Igor Saenko, St. Petersburg Institute for Informatics and Automation of Russian Academy of Sciences (SPIIRAS).

Website: mdpi.com/si/23684

Submission deadline: **31 October 2019**

This Special Issue will present unpublished theoretical and applied results related to the development of new approaches, models, methods, algorithms, software, and hardware for implementing the functions of decision-making and planning in modern **Telecommunication Systems (TCS)**.

These results will concern a rather wide range of issues affecting the application of advanced and innovative methods of data processing, resilience, security, safety, and throughput. These results will address a fairly wide range of issues affecting the application of advanced and innovative methods for decision-making and planning in TCS.
